

## **Introduction**

The Table below sets out the proposed further minor amendments to the Submission Version of the DPD in response to consultation on the 'Schedule of Proposed Changes' which were released for consultation between 27<sup>th</sup> November – 8<sup>th</sup> January.

<b>Proposed minor amendment</b>
<p><b>1) Amend / Delete text from Para. 6.7:</b></p> <p>On its own, the proposed southern extension to the town <del>could</del> <u>can</u> deliver all of the residential development identified for Tenterden in this DPD. <del>However, it would be prudent for an additional small allocation elsewhere in the town to provide some element of variety and to provide a greater level of assurances that the delivery of the residential target for Tenterden will be achieved. Hence, a small area at the western end of the town, close to the High Street is also proposed as site TENT 2 in the policies below.</del></p>
<p><b>2) Replace paragraph 6.28:</b></p> <p><i>'In addition, capacity in the local sewerage system is insufficient to service the proposed development. It will be necessary to upgrade the existing local sewerage infrastructure before the development can connect into it.'</i></p>
<p><b>3) Add to end of paragraph 6.55:</b></p> <p><i>'In addition capacity in the local sewerage system is insufficient to service the proposed development. It will be necessary to upgrade the existing local sewerage infrastructure before the development can connect into it. It is also important that existing sewerage infrastructure on site (phase 1) is protected and future access secured for the purposes of maintenance and upsizing'.</i></p>
<p><b>4) Replace paragraph 6.65:</b></p> <p><i>'In addition, capacity in the local sewerage system is insufficient to service the proposed development. It will be necessary to upgrade the existing local sewerage infrastructure before the development can connect into it.'</i></p>

**5) New paragraph after 6.75:**

*In addition, it is important that existing sewerage infrastructure on site is protected and future access secured for the purposes of maintenance and upsizing’.*

**6) Replace paragraph 6.83:**

*‘In addition, capacity in the local sewerage system is insufficient to service the proposed development. It will be necessary to upgrade the existing local sewerage infrastructure before the development can connect into it.*

**7) Replace paragraph 6.92:**

*‘In addition, it is important that the existing sewerage infrastructure on site is protected and future access secured for the purposes of maintenance and upsizing’.*

**8) Add to end of paragraph 7.45:**

*‘or the wider landscape.’*
